Yujin Floria Lee

Human-AI Interaction Researcher | UX Research | Mixed Methods | Experimental Design
Savoy, IL 61874 | yujinl3@illinois.edu | (484) 809-2527
Website: https://sites.google.com/view/floria-yujin-lee

EDUCATION

Doctoral Program in Communication and Media Studies Present
University of Illinois at Urbana-Champaign
- **Research Areas:** Human-AI Interaction, User Trust & Perception, User Decision-Making, Digital Product Experiences

Master of Science in Advertising December 2024
University of Illinois at Urbana-Champaign

Bachelor of Science in Advertising May 2022
University of Illinois at Urbana-Champaign

SKILLS & CERTIFICATIONS

Research Methods: Mixed Methods, User Interviews, Surveys, Experimental Design, Content Analysis, Statistical Analysis, Secondary Research
Analysis: Quantitative & Qualitative Analysis, Regression, SEM, ANOVA, Mediation/Moderation
Tools: Qualtrics, SPSS, R, Python, SQL, Excel, Figma
Certificate: Amazon Ads Foundation, Amazon Sponsored Ads, Amazon DSP, Amazon Video Ads, Google Project Management, Google Ad Search Certification

RESEARCH & PROJECTS

Human–AI Interaction & Perceived Autonomy _*User Research & Experimental Design*
- Designed and conducted user-centered research examining how perceived autonomy and authenticity in AI-generated agents influence user trust, decision-making, and behavioral intentions
- Translated experimental and survey findings into actionable insights about user trust and decision-making in AI-mediated environments

AI Trust & Digital Agent Research _*Experimental Design*
- Compared AI-generated and human digital agents through controlled experiments, identifying credibility factors that shape user trust and behavioral intentions and translating findings into design implications for AI-mediated experiences.

Autonomous Mobility User Experience Research_*Experimental Design*
- Designed controlled experiments to evaluate how in-vehicle experiences and interface messaging influence rider trust and adoption intentions in autonomous mobility platforms.
- Analyzed quantitative survey data using ANOVA, ANCOVA, and regression-based models to identify behavioral patterns and translate findings into implications for autonomous mobility user experience.

Qualitative & Content-Analysis Research_*Mixed Method*
- Conducted qualitative coding across 10 recovery apps, mapping features to four user personas to inform product and feature design
- Piloted AI-assisted coding against human coders on real-world social media data, evaluating reliability using a structured codebook

Streaming Media User Experience Research _*Mixed Method*
- Conducted in-depth interviews on user perceptions of streaming interruptions and advertising, integrating qualitative coding with survey analysis to identify user experience patterns.

PROFESSIONAL EXPERIENCE

Global GTM Lead_Heimdex, Remote April 2026 - Present
- Developed U.S. go-to-market strategy and competitive analysis for a B2B AI video search startup
- Analyzed target-user needs and audience behavior to inform positioning and go-to-market decisions for a B2B AI video search product.

Instructor of Record_University of Illinois at Urbana-Champaign August 2022 - Present
- Facilitated discussion-based learning sessions for up to 70 students and communicated complex research concepts in accessible ways
- Utilized statistical analysis methods (ANOVA, regression, mediation analysis) to interpret user and behavioral data
- Synthesized complex research findings and communicated actionable insights to audiences with varying levels of technical expertise.
